Handling the Magnetic Clasp

1. The magnets are glued into the two halved of the clasps. Do not use any heat nor leave the magnetic clasp in a cold environment.
2. The magnet is strong, but we do not recommend using it either for heavy necklaces or necklaces with South Sea pearls.
3. If, for whatever reason, the magnet is lost, it can be replaced by ordering series #23657.
4. The magnet is rarely a problem with pacemakers. If you have a pacemaker, please contact your doctor before handling or wearing.

Demika® Magnetic Clasps

The Demika® self-locking magnetic clasp has been designed for the customers who have difficulty fastening their existing necklaces or bracelet clasp. Just touch the magnetic ends together and the safety catch top locks down, automatically securing the clasp.
